

ENERGY SEAT®

ENERGY SEAT® TABLE - writing tablet for the press area

The press desk has a galvanized steel structure, with the possibility of powder-coating at the customer's request. The tabletop is made of a 10mm thick HPL board intended for outdoor use and has the appropriate certificates. The design of the tilting desk, built on a specialistic hinge, ensures durability and a sense of stability in the product. The desk is equipped with a masking cover, also made of HPL, 10 mm thick. Thanks to the innovative hinge, the desktop takes up only 10 cm of the row depth.

Dimensions of the table:

D: 10cm

H: 109cm

W: 45cm

Writing board dimensions: 45 x 40cm

Front board dimensions: 45 x 50cm

Recommended, minimum axial distance: 50cm
